Summary factsheet

SalesRep for Autopart - Key functionality summarized

This document summarizes the key functionality available within the salesRep application (app).

The SalesRep app enables a remote user to access information from their Autopart system via a wifi or suitable 4G or 5G network connection.

Available for iPad and Android tablets, the SalesRep app communicates directly with Autopart and enables an authorised user to retrieve customer account information, customer notes and transaction history.

The user may also check customer pricing, view inventory availability and raise orders directly from within the app.

It also enables a user to conduct managed inventory checks at a customer premise and to create replenishment sales orders.

Details of customer visits and calls may also be recorded within the app and are transferred to Autopart electronically.

Key Features

- Login remotely to Autopart via the app
- Capture customer orders
- Undertake inventory and pricing inquiries
- View customer account detail and order status summary
- Record customer calls and visits
- View outstanding & recent transactions
