Software: Product Description

KCS Core Software

Product	Description
K8 */** (K8 Software)	Core ERP and Business Management Solution for the distributive trades. Please see the relevant K8 Summary Factsheet which highlights the key features available within the relevant version of the K8 core product. In some cases you may need to upgrade to the latest service pack release to take advantage of all modules. License allows access to the core functionality only. K8 BMS enables API and Integration capabilities to facilitate real time and asynchronous communications with external applications. The license for K8 also includes use of the necessary elements of the KCML toolset.
KPrint/Print Manager */** (K8 Software)	Includes use of KCML toolset and standard core functionality only.
K8 Digital Services **	A suite of API's (including K8 E commerce) enabling an interface with specified software applications (including various KCS Other Software applications and external third party software products) and which permit a metered number of web-calls to flow between K8 and such applications.
EDI */** (K8 Software)	License for import and/or export of electronic data interface transactions to and from K8 Software.
K8 Offline Point of Sale	Enables a business to continue to trade at the counter when connectivity to the main K8 server has been lost. It provides facilities to capture both cash and collect sales for consumers and trade account holders within the POS interface. Payments

	for these sales may also be captured manually against each transaction. Please see K8 Offline Point of Sale summary fact sheet for more details.

KCS Other Software

Product	Description
K8 Web Builder */**	K8 Web Builder Software is a software tool that facilitates and supports webpage content management and online trading. Please see the K8 Web Builder factsheet for more details.
K8 Layered Applications **	K8 Layered Applications comprise of a suite of software applications and apps that have been developed to deliver optimized, mobile friendly experiences to users on Smartphones and other SMART devices. Note that these applications are designed to integrate with K8 and to utilise core K8 features and, as such, versions of these applications may be restricted to operate with specific versions of K8.
K8 Layered Application: **K8 ePOD** **	K8ePOD is a Layered Application which provides the ability to capture proof of delivery detail, including recording the recipient and their signature, for each delivery drop made. It allows for the delivery manifest, as built within K8, to be exported to a mobile device and for the delivery or collection for each drop to be confirmed remotely. Signatures, notes and photographs are automatically uploaded into K8 when the device is connected to the airwaves, with this detail stored against the specific delivery or collection within K8. Please see the K8 ePOD factsheet for more details.

K8 Layered Application: K8 eReceipts **	K8 eReceipt is a Layered Application is designed for use within a K8 standard branch (non WMS), enables a user to select a purchase order and to confirm receipt of expected lines from that purchase order, allowing for the receipt of various types of product. Please refer to the K8 eReceipts factsheet for more details.
K8 Layered Application: K8 ePick **	K8 ePick is a Layered Application which is designed for use within a K8 standard branch (non WMS), enables a user to select a pick to be undertaken and to then be guided to each bin in turn to process the pick. The user may confirm the quantity that is being picked either by keying the number or they may scan the product barcode and have the quantity picked automatically incremented. Please refer to the K8 ePick factsheet for more details.
K8 Sales Portal **	K8 Sales Rep Portal is designed to enable a user to place a sales order via the Portal and to have it raised within K8, using this online web based solution. Please refer to the K8 Sales Rep Portal factsheet for more details.
Vecta **	Vecta is an on-line Sales Analytics and CRM solution, secured within a Data Center, and accessible to authorised users over the public internet within a modern browser environment. Sales analysis and customer data, provided to Kerridge Commercial Systems Ltd (KCS) and in the format specified by KCS is uploaded to Vecta by KCS on a pre-agreed frequency.
Navigator */**	Navigator is an ERP solution that provides many features to service the requirements of the floor covering distribution industry. Please see the relevant Navigator Summary Factsheet which highlights the key features available within the relevant version of the product. In some cases you may need to upgrade to the latest service pack release to take advantage of all modules.

	License allows access to the core functionality only.
DNav Online */**	An on-line trading platform that is integrated with Navigator ERP. This allows for enquiries and sales orders to be placed electronically. Please see the DNav Online factsheet for more details.
DNav WMS */**	An integrated warehouse solution for Navigator ERP, this allows for warehouse tasks to be managed and processed, including picks and inter-branch transactions. Please see the DNav WMS factsheet for more details.
DNav Showroom Manager */**	An application that is integrated with Navigator ERP, this product allows for customer quotations to be built in a showroom environment and for sales orders to be electronically raised within Navigator. Please see the DNav Showroom Manager factsheet for more details.
DNav EDI */**	An application that is integrated with Navigator ERP and supports a number of specific electronic messages, including the import of sales invoices and the export of purchase orders raised within Navigator. Please see the DNav EDI factsheet for more details.
DNav Business Intelligence (DNav-BI) */**	DNav-BI is a device responsive, browser based application that enables a user to analyze data stored within Navigator. DNav-BI allows key performance indicators (KPIs) dashboards to be established and for these and reports to be viewed on a mobile device.
DNav Commercial Quote Manager (DNav-CQM) */**	DNav-CQM is a device responsive, browser based application that enables companies to track commercial job quotes from inception to completion.

ePOD for Navigator ****	ePOD for Navigator is a Layered Application which provides the ability to capture proof of delivery detail, including recording the recipient and their signature, for each delivery drop made. It allows for the drivers manifest, as built within Navigator, to be exported to a mobile device and for the delivery or collection for each drop to be confirmed remotely. Signatures, notes and photographs are automatically uploaded into Navigator when the device is connected to the airwaves, with this detail stored against the specific delivery or collection within Navigator. Please see the ePOD for Navigator factsheet for more details.
SmartDistributor */**	Smart Distributor is an ERP solution that is targeted at the general distribution market. Please see the relevant Smart Distributor Summary Factsheet which highlights the key features available within the relevant version of the product. In some cases you may need to upgrade to the latest service pack release to take advantage of all modules. Licence allows access to the core functionality only.
FabSmart */**	FabSmart is a software application that allows distributors to control and track the production and value-added costs related to the fabrication of products, from raw material picking to the assembly and receipt of kits and fabricated items. Tightly integrated with the SmartDistributor ERP solution from Kerridge Commercial Systems, FabSmart supports both build-to-order or build-to-stock activities for both on premise and offsite light manufacturing processes Please see the FabSmart factsheet for more details.
StockSmart */**	StockSmart is a warehouse management solution offered by Kerridge Commercial Systems. It is fully integrated into the SmartDistributor ERP solution but can also be interfaced into other back office systems. StockSmart allows wholesale distributors and 3PLs to control movement and storage of product into, within, and out of a warehouse, while supporting warehouse personnel in the performance of material movement and storage in and around a warehouse.

	Please see the StockSmart factsheet for more details.
ScanSmart */**	ScanSmart enables wireless automation of general warehouse activities using RF technology for distributors utilizing Kerridge Commercial Systems' SmartDistributor ERP by supporting activities such as picking, receiving, putaway, cycle counting, and allowing electronic capture of serial numbers and UPC codes Please see the ScanSmart factsheet for more details.
SigSmart */**	SigSmart is a mobile application integrated to Kerridge Commercial Systems' SmartDistributor ERP system that supports electronic signature capture and proof of delivery for both pickup / will call and delivered orders. Using a smart device, delivery drivers can scan pick tickets to create delivery stops or load pre-defined delivery manifests. They can then capture signatures or record delivery exceptions regardless of whether an Internet connection is available. Please see the SigSmart factsheet for more details.
Sales Portal **	Sales Portal is a fully responsive web application available from any device that can connect to the Internet. Sales Portal allows your sales people to access real time customer information, item price and availability, sales statistics, and to place new orders for customers without having to access the ERP.
EDI for SD */**	EDI provides a specific set of EDI (Electronic Data Interface) transactions that can be transmitted to and/or from the SmartDistributor ERP using either a VAN or via FTP to selected KCS Vendors
VMISmart */**	VMISmart provides Vendor Managed Inventory (VMI) capabilities to distributors utilizing Kerridge Commercial Systems' SmartDistributor ERP. VMI is an automated process of sharing inventory data with a vendor on a daily basis to allow the vendor to replenish the distributor's inventory to pre-determined

	minimums and maximums by transmitting the following EDI transactions: • 852 Product Activity Data • 855 Purchase Order Acknowledgement • 856 Advanced Shipping Notice • 810 Invoice • 820 Remittance Advice Please see the VMISmart factsheet for more details.
ConnectSmart	ConnectSmart is a suite of third party interfaces to the Kerridge Commercial Systems SmartDistributor ERP system, including: • ConnectSmart IntelliChief (*/**) – integration between SmartDistributor and IntelliChief's Document Management and Workflow solution • Connectsmart Alvara Avatax (**)
Avalara AvaTax ****	The Avalara AvaTax Interface is a series of REST APIs used to interface Kerridge Commercial Systems' SmartDistributor ERP to the AvaTax and CertCapture solutions provided by Avalara. Please see the Avalara AvaTax Interface factsheet for more details.
ePOD for SmartDistributor ****	ePOD for SmartDistributor is a Layered Application which provides the ability to capture proof of delivery detail, including recording the recipient and their signature, for each delivery drop made. It allows for the drivers manifest, as built within SmartDistributor, to be exported to a mobile device and for the delivery or collection for each drop to be confirmed remotely. Signatures, notes and photographs are automatically uploaded into SmartDistributor when the device is connected to the airwaves, with this detail stored against the specific delivery or collection within SmartDistributor. Please see the ePOD for SmartDistributor factsheet for more details.

inspHire Corporate * / **	Core Asset Management solution for the rental trades, this product contains features that support the management of rental operations. In addition to this core solution, a number of optional modules are available: Workshop module - enables the creation, management and processing of workshop jobs. Bill of Materials module - enables the creation, management and processing of BOM workshop jobs.
